

Digitized Business Excellence (BEX) Benefit Assimilator Saves 75% of Tracking Efforts for a US-Based Community Bank

Client Introduction

A leading community bank in the US with a diverse services portfolio in small and middle-market banking, mortgage, public finance advisory services, and Small Business Administration lending.

Problem Statement

- ❖ Inflexible and unscalable method for capturing the process improvement benefits
- ❖ Effort-and-time intensive process – Not repeatable and reproducible
- ❖ Inadaptable to different work types and teams
- ❖ Lack of real-time MIS

Solutions Offered

Anptyss conceptualized a benefit-tracking mechanism with real-time reporting capabilities, including burn up and burn down charts to track the benefits against goals, agnostic of the work type or department.

The solution leveraging Anptyss' Digital Knowledge Operations (DKO™) framework helped drive fungibility, scalability, and adaptability.

Key solution delivered:

Effort-tracking mechanism based on a tailored approach.

Real-time conversion of efforts to track the business impact.

Automated charting with real-time visual management.

Business Outcomes

75% reduction in the efforts to track benefits

Real-time “benefit versus goal” tracking

Replicability across the bank’s departments
